Case In Point: mediaXstream

“Together Atlantic Metro and MediaXstream provide an efficient delivery platform that enables production companies to quickly transmit, edit and ultimately broadcast high-definition Internet and television entertainment to the mass-market.”

–Joe Ramsey, SVP Marketing, MediaXstream

The Opportunity:

MediaXstream is a carrier-neutral, high quality transport and managed network service provider for the production and broadcast industries. MediaXstream required a fiber solution provider that was flexible, reliable and customer-focused. With roots in metro fiber connectivity, MediaXstream knew the hurdles often associated with deploying a top-notch dark fiber solution to state-of-the-art, entertainment arenas that require low-latency transmission services.

The Solution:

After a thorough search, MediaXstream selected Atlantic Metro to deploy and manage its metro area dark fiber network.

The Results:

Since deployment, Atlantic Metro and MediaXstream continue to work on multiple deals that require fast, dedicated dark fiber solutions connecting MediaXstream's core network, located at 60 Hudson Street in New York, to various sports and entertainment venues in the NY metro area. Atlantic Metro's fast deployment helps to ensure real revenue and high performance for MediaXstream.
